

Phase 1: Brainstorming & Ideation

Brainstorming & Idea Prioritization

1. Executive Summary

ComicCraft is an innovative AI-driven creative storytelling platform designed to democratize comic book creation. It bridges the gap between imaginative conceptualization and artistic execution by combining cutting-edge Large Language Models (LLMs) with high-fidelity visual generative diffusion models. This document details the ideation process, concept selection criteria, and prioritization matrix that led to the development of ComicCraft.

2. Ideation & Concept Generation

During the brainstorming phase, several potential AI and Generative AI application concepts were explored to address contemporary challenges in creative media production, accessibility, and interactive education:

Concept Candidate	Description	Target Audience	Primary Technical Stack
Concept A: ComicCraft (Selected)	Automated multi-panel comic strip creator combining Gemini Flash (outlining), Gemini Pro (narrative/dialogue), and Diffusion models (visuals) with instant PDF compilation.	Storytellers, educators, non-artist writers, students.	FastAPI, Gemini 1.5, Stable Diffusion, FPDF.
Concept B: CodeTutor AI	Interactive programming debugger and code reviewer with visual flowchart generation.	Computer science students.	FastAPI, Gemini Pro, Graphviz.
Concept C: ResumeCraft	AI resume writer and automated portfolio website builder.	Job seekers, professionals.	Flask, Gemini Flash, HTML/CSS.
Concept D: MusicGen Pod	Text-to-audio background music and sound-effects generator for podcasts.	Podcasters, YouTubers.	PyTorch, AudioCraft, FastAPI.

3. Prioritization Framework: Impact vs. Feasibility Matrix

- Each proposed concept was evaluated against four core dimensions:
- 1. Creative Impact & Engagement (30%): Uniqueness of output and user engagement.
 - 2. Technical Feasibility & Model Synergy (30%): Practicality of orchestration using Gemini LLMs and diffusion models.
 - 3. Execution Clarity & Milestone Alignment (20%): Feasibility of delivering an end-to-end working prototype within the academic timeline.
 - 4. Demonstration Value (20%): Visual appeal, interactivity, and tangible artifacts (PDF export, web preview).

4. Prioritization Scoring Table

Evaluation Criterion	Weight	Concept A: ComicCraft	Concept B: CodeTutor	Concept C: ResumeCraft	Concept D: MusicGen
Multimodal Synergy (Text + Vision)	25%	9.5 / 10	6.5 / 10	5.0 / 10	7.0 / 10
User Accessibility (Non-technical)	25%	9.0 / 10	5.5 / 10	8.5 / 10	6.0 / 10
Architectural Elegance & Modularity	25%	9.2 / 10	8.0 / 10	7.5 / 10	6.5 / 10
Visual Deliverable Quality (PDF/UI)	25%	9.8 / 10	6.0 / 10	7.0 / 10	5.5 / 10

| Weighted Total Score | 100% | 9.38 / 10 | 6.50 / 10 | 7.00 / 10 | 6.25 / 10 |

5. Final Recommendation & Strategic Decision

ComicCraft emerged as the undisputed standout project. It demonstrates:

- A sophisticated multi-model AI pipeline coordinating Gemini Flash (structured orchestration), Gemini Pro (creative literary synthesis), and Diffusion image generation.
- Tangible user value by solving the high barrier-of-entry to comic book illustrating.
- A complete product lifecycle from prompt ingestion to high-resolution downloadable PDF output.
