

Phase 8: Project Demonstration

Demonstration of Proposed Features

1. Overview

This document provides a step-by-step visual and operational demonstration script for ComicCraft, showcasing the execution of the three core user scenarios outlined in the project requirements.

2. Scenario 1: End-to-End Comic Creation (The Brave Fox)

Objective

Demonstrate how a user enters a basic story concept and receives a complete 5-panel comic strip with illustrations, dialogues, and PDF compilation.

Step-by-Step Walkthrough:

1. Access Homepage: Open <http://127.0.0.1:8000/>.
2. Apply Preset: Click the preset chip: The Brave Fox (Forest / Dramatic).
 - Prompt: "A brave fox explores an enchanted forest."
 - Character Name: "Free"
 - Setting: "Enchanted Forest"
 - Tone: "Dramatic"
 - Art Style: "Realistic"
3. Initiate Generation: Click [!] GENERATE COMIC STRIP.
4. Observe Loading Feedback: The animated comic card appears showing POW!, ZAP!, and status messages detailing the AI pipeline steps.
5. Inspect Preview Page:
 - The browser loads /generate.
 - Five beautifully formatted panels appear sequentially.
 - Each panel displays:
 - Title: e.g., Panel 1: The Threshold: Forest, Panel 2: Into the Deep Unknown
 - Illustration: 768x512 comic panel art centered with dark frame.
 - Scene Description: Italicized environmental context.
 - Caption Box: Yellow comic box with CAPTION: Whispers carried on the wind...
 - Narration Box: Dark narrator box with NARRATION: Free, the bravest fox...
 - Speech Bubble: Character dialogue lines.
 - Image Prompt Reference: Full artistic description used for diffusion.

3. Scenario 2: Tone & Art Style Customization (Humorous & Comic Book)

Objective

Demonstrate the flexibility and rapid iteration capability of the system by modifying the mood and visual style.

Step-by-Step Walkthrough:

1. Return to Home: Click New Story or navigate to <http://127.0.0.1:8000/>.
2. Modify Preferences:
 - Select Tone: Funny / Humorous
 - Select Art Style: Classic Comic Book
 - Enter Character: "Barnaby the Apprentice"
 - Enter Prompt: "A clumsy apprentice wizard turns the headmaster's hat into a duck."
3. Generate: Click [!] GENERATE COMIC STRIP.
4. Inspect Output:
 - The storyline regenerates with humorous dialogue and comedic pacing.
 - The visual panels adopt classic comic book aesthetics with bold outlines and halftone textures.

4. Scenario 3: Publication, PDF Download & Confirmation

Objective

Demonstrate compiling the comic into a multi-page PDF document and confirming successful download.

Step-by-Step Walkthrough:

1. Trigger PDF Download: On the preview page, click Download Your Comic as PDF.
2. File Download Stream: The browser immediately downloads comic_YYYYMMDD_HHMMSS.pdf directly to the user's Downloads folder.
3. Automatic Navigation: The user is seamlessly redirected to the Comic Exported Successfully! page (/export-success).
4. Inspect Export Success Screen:
 - Celebratory header and icon.
 - Confirmation of the exact exported filename.
 - One-click button to re-download if desired.
 - Go Create Another Comic CTA button returning to the creator home.
5. Inspect Local PDF Document:
 - Open the downloaded PDF in any PDF viewer.
 - Verify exactly 5 pages (1 page per panel).
 - Verify clear TrueType typography, centered artwork, and running page footer.
