

Phase 8: Project Demonstration

Team Involvement in Demonstration & Project Roles

1. Team Distribution & Collaborative Responsibilities

The ComicCraft project was conceptualized, engineered, and demonstrated through synchronized collaboration across core engineering domains:

- | Team Member / Role | Domain Focus | Primary Technical Deliverables | Demonstration Segment |
- | :--- | :--- | :--- | :--- |
- | Team Lead & AI Architect | Generative AI & Orchestration | Integration of Gemini 1.5 Flash outliner, Gemini 1.5 Pro narrative engine, prompt engineering. | Opening presentation, architecture explanation, and Gemini model synergy. |
- | Backend & Systems Engineer| Server & Document Engine | FastAPI backend routes (routes.py), ThreadPool concurrency, FPDF2 Unicode PDF compiler (exporters.py). | Live code walkthrough, API Swagger documentation, and PDF structure verification. |
- | Frontend & UI/UX Designer | Interface & Design System | Jinja2 dynamic templates, CSS comic design system, interactive presets, loading overlays. | Web form demonstration, style preset testing, and comic preview inspection. |
- | QA & Documentation Specialist| Testing & Verification | Automated test suites (TestClient), benchmarking, phase-wise documentation, video recording. | Test results presentation, user scenario walkthroughs, and Q&A handling. |

2. Peer Review & Verification Checklist

- [x] All team members verified the end-to-end user journey locally.
- [x] Codebase passed automated testing with zero unhandled exceptions.
- [x] Exported PDF verified across multiple PDF readers (Adobe Acrobat, Preview, Chrome).
- [x] Phase-wise documentation reviewed and finalized according to the SmartBridge submission template.
- [x] Video demonstration script rehearsed and recorded for submission.
